Summary:

With nearly seven years of front-end development experience, I specialize in building scalable, well-documented code. My expertise includes React.js, Next.js, JavaScript, HTML/CSS, Redux, and TypeScript, as well as tools like Tailwind, Bootstrap, Material UI, and more. I continuously learn and stay current with the latest technologies to create high-quality, user-friendly applications. I'm eager to contribute to an organization that supports both personal and professional growth.
