EXPERIENCE

Frontend Developer | QUBY

07 2021 – Present

Tehran, Iran

- Developed a web application that attracted more than 25,000 users.
- Participated with back-end developers to establish more than 6 projects
- Mentored 1 intern, guiding them in learning and developing projects.
- Worked on about 3 projects related to the Internet of Things.
- implemented responsive and user-friendly web interfaces using HTML, CSS, and JavaScript for 6 projects, resulting in a 30% increase in user engagement.
- Collaborated closely with 3 designers and 2 back-end developers to successfully integrate and implement user interface designs.
- Conducted daily code reviews for 1 intern, providing timely feedback.

Frontend Developer | DATIS

12 2019 – 05 2021

Tehran, Iran

- Teamed up with 2 back-end developers to develop three Admin dashboard templates.
- Achieved 40% improvement in website performance by strategically reducing page load times, resulting in enhanced overall site functionality.
- Increased websites' quality by proactively addressing bugs through rigorous debugging and testing, ensuring robust and seamless user experiences.

Frontend Developer | Freelance

04 2019 – 12 2019

Lahijan, Iran

- More than 5 projects including A-EYES and Bencherz using Angular and React.
- Executed thorough compatibility testing for applications and websites across diverse devices and browsers

Frontend Developer | NilaSoft

01 2018 – 04 2019

Rasht, Iran

- Worked with 1 UI/UX designer and 2 front-end developers to seamlessly integrate visually captivating and intuitive user interfaces.
- Coordinated with 3 backend developers to implement changes and conduct testing for more than 2 websites.
- Enhanced website functionality by integrating third-party APIs and libraries.
- 2 responsive websites using the Angular framework.

EDUCATION

Bachelor of Mechanical Engineering | Guilan University

PROJECTS

A-EYES Webapp | 🌐

📅 06 2023 – 12 2023

- Innovated an AI-powered web app for diagnosing and treating dry eye disease, demonstrating a commitment to healthcare solutions.
- Crafted a user-friendly interface featuring a streamlined process: activate your phone's flash, capture images of your eyes, and await prompt results.
- Introduced an interactive chart functionality, enabling users to effortlessly review their historical results and fostering a more engaged and informed user experience.

Bencherz 📅 01 2024 – Present

- A cutting-edge fantasy football web app, incorporating cryptocurrency and NFTs, set to revolutionize the gaming experience.
- Pioneered the introduction of a Play-to-Earn feature, creating an innovative and rewarding user engagement model.
- The application is on leading blockchain tokens like Ethereum and Solana, showcasing a commitment to robust and secure technology. Upcoming release
- Anticipating an upcoming release, the project aims to redefine user experiences by seamlessly blending fantasy football with the transformative capabilities of blockchain technology, presenting a novel and engaging paradigm.

QUBY web application | 🌐

📅 07 2022 – Present

- A user-friendly web app for hassle-free purchases from Quby's smart refrigerators, serving 25,000+ users.
- Simplified the buying process for swift transactions, ensuring a speedy and user-friendly experience.
- Introduced an intuitive purchase method—scan the barcode, open the door, place your item, and close the door—making it easy and efficient.
- Added convenience with straightforward access to purchase history, enhancing the overall user experience.
